

IntelPeer: A Leader in Cloud Communications

IntelPeer[®], Inc. is a leading provider of cloud communications services for service providers and enterprises. IntelPeer's solutions help customers to enhance productivity and generate new sources of revenue with little or no additional capital expenditures and improve the financial return on their communications equipment and services investment.

CloudWorx™ – Cloud-based Communications as a Service

The company is transforming communications through the CloudWorx™ platform, its Cloud-based, carrier-grade Communications-as-a-Service solution, which combines a Media Peering Grid™ service, SuperRegistry[®] global directory of more than 450 million telephone numbers and end point identifiable addresses and AppWorx[®] application development environment and tools, making it easy, fast and cost-effective for businesses and service providers to deploy IP communications. The patented CloudWorx platform provides customers an on-demand, pay-as-you-go service with no additional infrastructure investments required, delivering high-quality voice, video, SMS and other rich-media communications to any phone or IP connected device worldwide. By leveraging the CloudWorx platform, organizations can communicate through the Cloud via a scalable, reliable platform, ensuring interoperability between legacy PSTN telephone systems and IP communication technologies.

CloudCentral™ – Manage services online, quickly and easily

The IntelPeer CloudCentral™ portal makes it easy for customers to order and manage communications services. Through the simple, customizable dashboard with drag-and-drop personalization, customers can order new services, manage and change existing services, view and download detailed invoices, and connect to 24/7 service and support.

- 60+ service provider peering partners

Partners

Cisco

Microsoft

Avaya

Interactive Intelligence

Siemens

Service Providers

Service providers around the world use IntelPeer's communications services like DID's, Toll Free, etc., and services to bridge their disparate IP networks, provide gateways to the PSTN, and both originate and terminate their calls in the most cost effective manner with the highest reliability and quality. IntelPeer's secure, reliable, managed quality VoIP communications services offer service providers a number of benefits including low cost inbound and outbound services across hybrid networks, fully managed and supplied gateways, billing systems that are accurate, responsive and secure, proactive service monitoring, and 24/7 technical support.

Enterprises

IntelPeer offers CoreCloud™ SIP Trunking services that leverage their carrier-grade platform and Media Peering Grid services which aggregate 60+ service provider peering partners. Additionally, Toll Free, DID, number porting, directory and E911 services can be flexibly and quickly provisioned on-demand from the cloud via their CloudCentral portal. The IntelPeer AppWorx® application development environment provides the tools to develop communications-enabled applications that enhance collaboration and productivity. With IntelPeer's cloud communications services, enterprises can transition from TDM to advanced cloud-based IP solutions while leveraging their existing telecommunications investments. The IntelPeer Super Registry directory provides intelligent routing for the lowest cost, highest quality calls and enables a global directory for delivery of multi-modal communications including voice, video and unified communications. These communication services are available for both enterprise unified communications deployments and contact centers.

Partners

IntelPeer's partners are generating new revenue streams and building businesses through its services. These services include CoreCloud™ SIP Trunking, Toll Free, DID and E911 services. IntelPeer's partners are assured that the CoreCloud SIP Trunking services they sell will interoperate and work reliably through qualification from major technology partners like Microsoft, Cisco, Avaya, Siemens and Interactive Intelligence.
