**VoEX™ OPENS NEW OPERATIONS CENTER IN DENVER AREA**

*VoIP managed services provider opens new office to support continued growth*

**FOSTER CITY, Calif., USA, February 21, 2007** — VoEX™, Inc., a major VoIP managed services provider, announced today it has opened a new corporate office in the Denver area. VoEX will occupy office space at 320 Interlocken Parkway in suburban Broomfield, Colo. This additional location will allow VoEX to expand its Operations organization to support the company's continued rapid growth.

The additional location provides geographic diversity from VoEX corporate headquarters in the San Francisco Bay Area and its roots in Grand Rapids, Mich. The centralized location of the new office will also allow VoEX easy access to its customers and network Points of Presence, as most major metropolitan areas in the United States are directly reachable from the Denver Area. VoEX will be able to maintain its high quality service levels while effectively serving customers located throughout North America.

"As VoEX continues its innovation in VoIP services, this office will become an integral part of the company's growth," said COO Brent Bourne. "We're looking forward to joining the Denver area's high-tech community and doing our part to help it grow."

**About VoEX**

VoEX™, Inc., is a VoIP managed-service provider offering global peering infrastructure, network interoperability, industry-leading quality of service and advanced applications capabilities for top-tier carriers, mobile operators, cable operators, voice service providers, call centers, academic institutions and enterprises. VoEX maps the world's phone numbers to resolvable IP addresses by combining an advanced carrier-grade VoIP peering infrastructure with the world's largest carrier ENUM registry - now totaling over 250 million phone numbers - to interconnect IP, TDM and hybrid-network service providers at disruptively low prices. For all service providers, VoEX offers proven, unprecedented quality of service through its intelligent routing, multiple protocol support, and adherence to industry standards.

VoEX is a privately held company headquartered in Foster City, California, with global operations serving customers throughout North America, Europe and Asia.
