Simple Cloud-Managed Communications for SMBs

Want to upgrade your phone service but aren't quite ready to fully move to the cloud for communications? IntelePeer's Atmosphere® Voice Services delivers the benefits of cloud-based phone service through the Cisco Business Edition 4000, which gives you the feature set you need in a premises-based device that is easily managed in the cloud.

Deploy flexible, scalable, reliable service

Switch to Atmosphere® Voice Services for business phone service that saves you an average of 40% over legacy telecom and gives you the flexibility to scale service as needed. Our rock-solid network delivers industry-leading service availability and call delivery, along with redundancy and other disaster recovery features to help ensure business continuity. Atmosphere® Voice Services and Cisco Business Edition 4000 streamline the provisioning process for quick deployments and simplified service management.

Future-proof your communications

Start on a migration path that lets you easily upgrade to complete cloud communications when you're ready. Unlock additional Atmosphere® network-level, cloud-based functionality that turns your phone service into tool that helps you grow, such as:

- Advanced IVR with automation and integrations
- Intelligent call routing based on time of day, location, and more
- Call recording
- Call monitoring
- Call reporting

Leverage these capabilities for industry or business-specific applications that you can't get from a regular phone system—send out patient appointment reminders, gather feedback through a survey, let customers pay self-pay bills, and much more.

Enjoy award-winning customer service

Deploy confidently with the leader in voice services since 2003. Our products are backed by an award-winning team of experts who are there every step of the way to help design solutions, get your services turned up quickly, and provide 24x7x365 technical support.

Why Atmosphere® Voice Services?
